

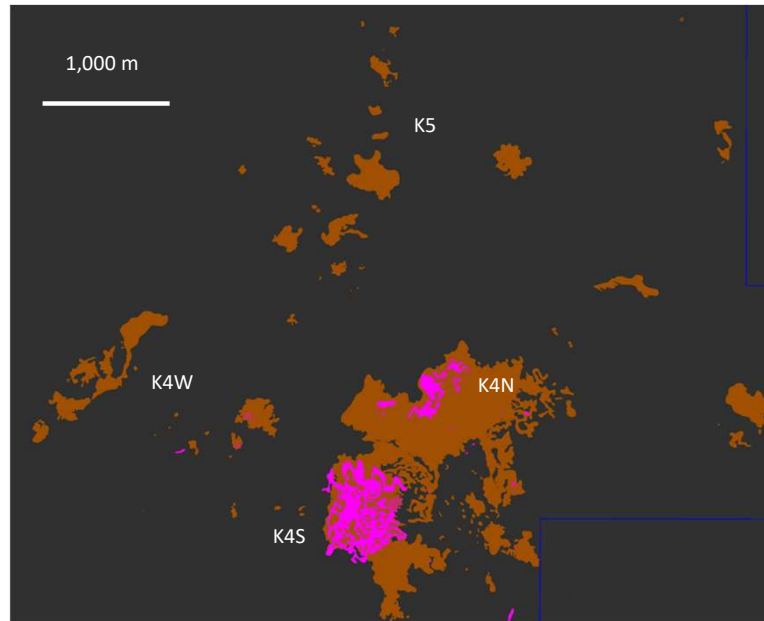

Figure 14: K4-5 Artisanal workings are Comparatively LARGE !!!
Surface Workings 1.5- 5 times larger than other bread and butter 4-7Moz West African Deposits

As shown in Figure 12 Artisanal workings especially shafts are an excellent indicator of potential.

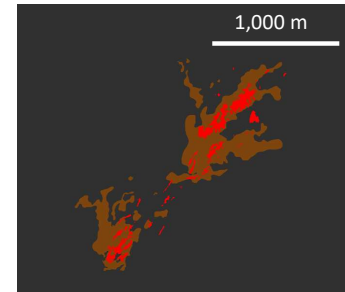

Here we compare workings associated with several example known deposits with the workings associated with K4-5 workings.

Surface Artisanal Workings: Brown
 Saprolite Shafts: Red/Pink.
